30G

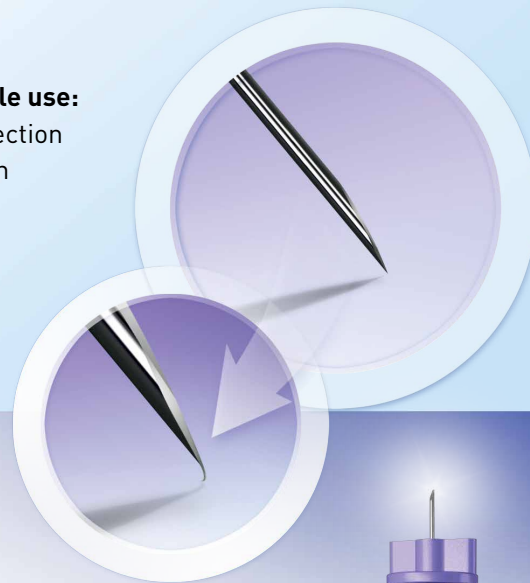

ultra  
thin

- ultra thin and precise
- delicate – silicon-coated needle minimizes pain
- especially recommended for patients with delicate skin, including children
- universal – fits most lancing devices available on the market

**Results of multiple use:**

- high risk of infection
- increase of pain
- tissue damage
- slow healing

28G

- thin and perfectly ground
- recommended for adults and patients with thicker skin
- universal – fits most lancing devices available on the market

**1x use**

**Remember!**

Use Droplet® lancets **only once** and dispose of after use
