

**droplet**<sup>®</sup>  
pen needles

# STERILE, SINGLE-USE PEN NEEDLES

Intended for use with pen injector devices  
for the subcutaneous injection of drugs

## Product intended use

Sterile, single-use pen needles intended for use with pen injector devices for the subcutaneous injection of drugs.

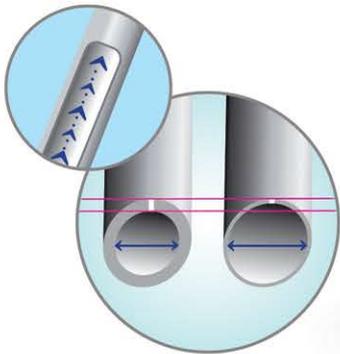

## Product features

Our pen needles proactively address:<sup>1</sup>

- easy adjustment
- greater convenience
- quick and comfortable use

### Smart

Thin wall with bigger inner diameter provides fast and adequate insulin flow.<sup>2</sup>

### Soft

Precise 3-bevel grinding designed for smooth and gentle injection.<sup>3</sup>

Unique „in-house“ lubrication method DROPLICON™ for smooth and gentle injection.<sup>1</sup>

### Simple

Easy adjustment of pen needle on pen injector.<sup>1</sup>

Outer cap shape with ribs to remove the protective cap.<sup>4</sup>

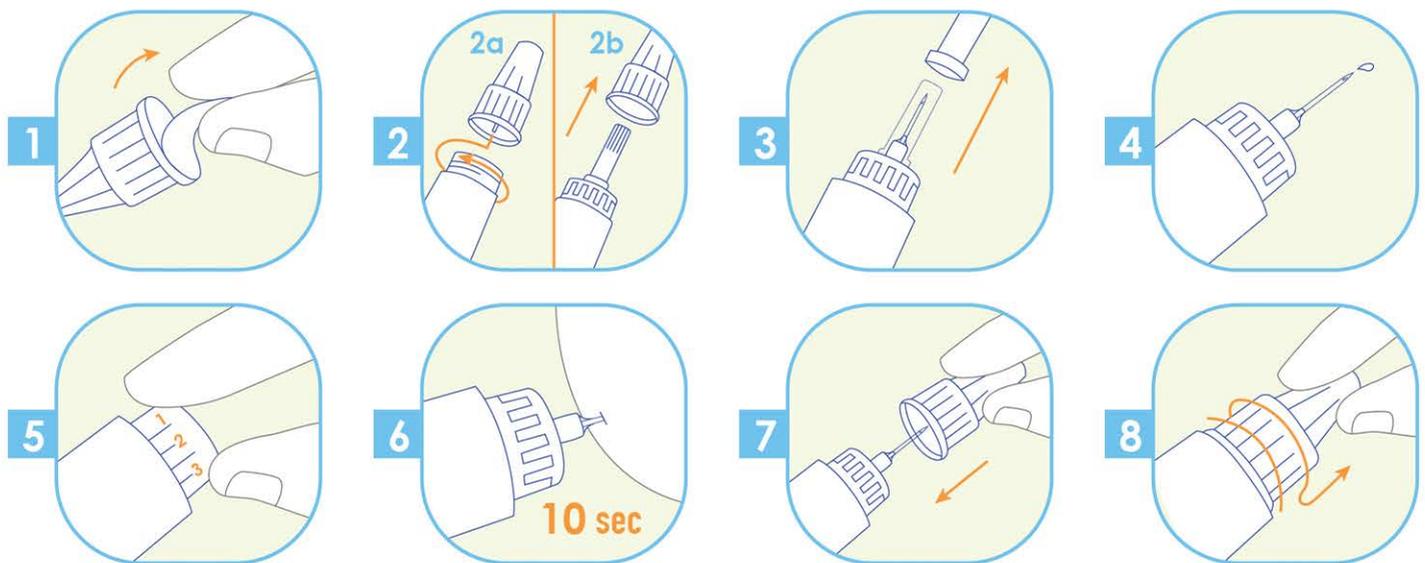

## Diabetes facts

Diabetes is a disease in which the body is unable to properly use and store glucose. Glucose backs up in the bloodstream — causing one's blood glucose (sometimes referred to as blood sugar) to rise too high.

Diabetes can cause serious health complications including heart disease, blindness, kidney failure, and lower-extremity amputations.

For many diabetics, injections are just a part of life – they require multiple injections per day.

## How to use droplet® pen needles:

Patients should remember to rotate injection sites, according to applicable insulin delivery recommendations.<sup>5</sup>

Droplet® pen needles are sterile and for single use only. Sterility is guaranteed if the needle seal is unbroken.

Remember! Droplet® pen needles should be used only once and disposed of in a sharps container.

### Re-usage can:

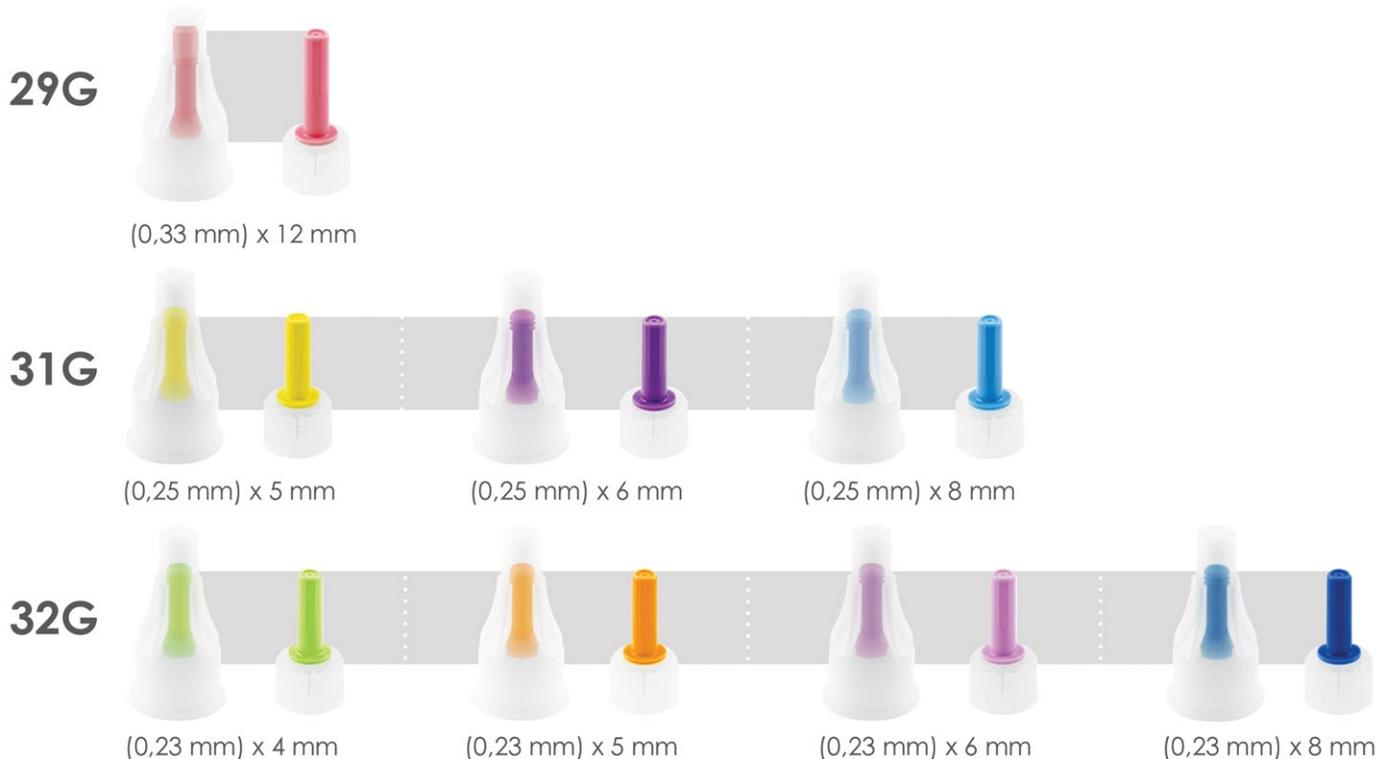

- lead to needle breakage<sup>6</sup>
- cause lipohypertrophy<sup>5</sup>
- dull or bend the tip, causing bleeding, bruising, or scarring<sup>5,7</sup>
- increase the risk of the needle breaking off in the skin<sup>6</sup>
- increase the risk of infection because the needle is no longer sterile<sup>7</sup>

# droplet<sup>®</sup>

pen needles

Sterile, single-use pen needles intended for use with pen injector devices for the subcutaneous injection of drugs.

## Available in eight versions:

droplet<sup>®</sup> **pen needles** are compatible with most pens available on the market, for more information visit: [www.htl-strefa.com](http://www.htl-strefa.com)
